## **DETAILED ACTION**

### ***Response to Amendment***

1. The declaration under 37 CFR 1.132 filed 3 October 2005 is sufficient to overcome the rejection of claims 24-46 based upon Sun Microsystems, Inc. "iPlanet".

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 39, 43-46 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. Although claims 39, 43-46 recite a computer readable medium comprising instructions to perform computerized operations, the claims do not seem to produce any useful, concrete and tangible results. Claim 39 will be favorably considered if amended to include the last limitation of method claim 31.

### ***Allowable Subject Matter***

3. Claims 24-38 are allowed.
4. Claims 40-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not disclose or make obvious:

- A system for providing service attribute information including a directory server having attribute templates defined with respect to services and an organization level and a managed role level wherein an application is configured to designate

a predefined service attribute in response to a query for said predefined service attribute associated with one of a plurality of target entries in the directory server, including all the limitations recited in claim 24

- A method for searching a tree structured hierarchical directory server including accessing first and second roles and creating a third role comprising attributes identifiable in the first and second roles, in combination with all the limitations recited in claim 31.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
